

Business Management & Accounting with a Property Management emphasis

20

Associate of Applied Science

MONTHS

Available Online: This program is delivered fully online.
California Locations: National City, San Diego, San Marcos

Business Management Job Outlook

Property management training can open valuable employment opportunities: many employers encourage their managers to take business and property management courses to develop their management skills and expand their knowledge. Managers also participate in these programs to prepare themselves for positions of greater responsibility in property management.

Job opportunities in the property management field are expected to be best for jobseekers with a degree in business administration, real estate, or a related field and for those who attain a professional designation. Overall, employment of property managers is projected to increase by 8 percent through 2008â€“2018.

Associateâ€™s in Business Management and Accounting

Designed to provide a strong background in accounting, marketing, insurance, finance, electronic commerce, and more, the Associate of Applied Science in Business Management and Accounting with a Property Management emphasis at California College San Diego can help develop the skills necessary for a variety of responsible management positions, as well as prepare graduates to sit for various property management certifications (which takes extra time and expense beyond the degree). The program focuses on ethical responsibilities, accountability, analytic thinking, and the leadership styles that lead to effective management qualities in all fields.

Business Management and Accounting Related Careers

While some office managers in smaller organizations or in entry-level positions may only need a high school diploma with relevant experience, an associateâ€™s degree is increasingly preferred. An associateâ€™s degree in business management and accounting could open up a number of doorsâ€”graduates can often find opportunities as accountants, cost estimators, administrative support workers, purchasing managers, corporate buyers, or purchasing agents.

May be completed in as few as 15 months under a flexible accelerated schedule.
